

VACANCY

Mechanical Project Engineer

Irish Cement Limited is seeking applications for the position of a Mechanical Project Engineer in Limerick Cement Works, Castlemungret, Co. Limerick. The role mainly involves projects work in a heavy industry environment. The candidate will also require an understanding of civil and electrical engineering aspects of projects.

Irish Cement Limited is a fully owned subsidiary of CRH plc and has manufactured cement in Ireland for over 85 years. It operates two cement-manufacturing facilities, one situated in Platin, approximately 5km from Drogheda, Co. Louth and a second in Castlemungret, Co. Limerick. Production uses the most advanced, energy-efficient technology to create a range of high-quality cements to the highest Irish and International standards.

Duties and Responsibilities

- ✓ Manage all phases of projects – safety, concept development, design, budgeting, tendering, procurement, installation, contract management and commissioning while complying with all Safety Regulations.
- ✓ Projects are predominantly heavy mechanical engineering projects
 - New equipment installations
 - Construction and modifications of industrial buildings
 - Equipment modification and installation
 - Civil upgrades and refurbishments
- ✓ Safety Management from design stage through to construction and commissioning
- ✓ Develop project concepts and present to site management for discussion and evaluation
- ✓ Work with equipment suppliers on detailed equipment layout design, considering current and future requirements
- ✓ Coordinate civil and structural steel design
- ✓ Coordinate design aspects with the electrical engineering team
- ✓ Management of multiple stakeholders – safety consultants, designers, equipment suppliers, specialists throughout all phases of the project
- ✓ Develop project budgets and maintain project costs in line with budget

- ✓ Prepare, issue, and evaluate tender packs for the various work packages
- ✓ Ensure project timelines are adhered to

Essential Qualifications, Knowledge and Skills Experience:

The candidate should bring a positive attitude and self-starting ability with the aptitude to take ownership of projects as required and see them through to completion. Along with:

- Appropriate degree qualification in Mechanical Engineering.
- A minimum of 5-8 years' experience in Managing Teams /Projects in heavy industry.
- Proficient in Microsoft Office, Microsoft Project and AutoCAD
- Excellent communication, negotiating and influencing skills.
- Experience of working on projects under PSDP / PSCS conditions
- Experience operating in a heavy industry environment an advantage.

Outstanding candidates who do not possess all the above criteria may also be considered. A remuneration package will be provided commensurate with experience

This vacancy provides an exciting opportunity for the successful candidate to join a multi-national organisation with possibilities for progression within Irish Cement and the wider CRH group. CRH is headquartered in Ireland and currently operates in 29 countries with over 3,155 locations and employs 73,000 people. www.crh.com

Candidates wishing to be considered for this position can submit a current CV to careers@irishcement.ie entitled "Mechanical Project Engineer Limerick Works".
